PROFILE

I am a confident, sociable person with strong leadership qualities. I can work on my own initiative but am also an excellent team player. I relish responsibility and always embrace the unknown as a chance to learn. With over six years of industry experience, I have honed my skill-set to become a Front-end specialist, particularly in the areas of app and web development.

Key Skills & Technologies: *ES6 JavaScript, React, Redux, Material UI, HTML5, CSS3, Sass, WCAG 2.1, NodeJs, Express, REST, Docker, Jest, Cucumber, Enzyme, Testing Library, Puppeteer, ESLint, Camunda, Form.io, Keystone, Leaflet, MongoDB, Neo4j, GIT, Figma, Postman, Lighthouse, Jira, Confluence, Agile, Scrum*

EMPLOYMENT HISTORY

Senior Consultant & Front-end Craft Lead at Deloitte Digital, Bristol

Nov 2019 – Present

I have taken a leading role in many successful greenfield projects for large public sector clients. My performance was recognised by a promotion to Senior Consultant after just 6 months of joining the firm. Some of my technical capabilities include:

- Comfortable implementing complex features such as API layers, custom components, third-party integrations and asynchronous functionality.
- Able to read complicated technical documentation and source code to find solutions.
- Assuring quality through automated testing and code review.
- Opinionated about code structure and best practice.
- Mentoring other developers and helping them to up-skill.
- Liaising with clients in order to break down requirements into measurable tasks.
- Presenting complicated technical information in an understandable way.

As the Front-end Craft Lead for Deloitte's UK Systems Design & Engineering capability, I am responsible for:

- Setting down standards and best practices.
- Defining learning and development pathways and enabling improvement of front-end capabilities through coaching, mentoring and knowledge-share.
- Playing a crucial role in the recruitment of front-end candidates at all levels - involving CV screening, conducting interviews, reviewing assessment results and providing feedback.

Softawre Developer at Toumetis, Bristol

Sep 2015 – Dec 2018

During my time at Toumetis, I worked on a number of commercial hybrid applications, particularly in the IOT and smart-home automation industry. I was able to gain experience in creating new applications from the ground-up, but also in maintaining well-established applications with a vast, complicated code-base. The role demanded versatility and the ability to work with large distributed teams across the globe.

EDUCATION

MEng Computer Science (2:1), University of Bristol

Oct 2011 – Jun 2015

John Hampden Grammer School

Sep 2004 – Jun 2011

A-Levels: Computing (A*); Physics (A*); Maths (A)
